

# Paddle Green Bags

There are over 332,519,000 cubic miles of water on the planet

6.14 million tons of marine debris enter the oceans each year

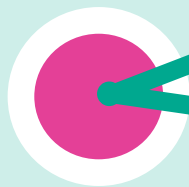

Marine pollution is a world-wide problem causing multiple environmental impacts

Plastics are the most common type of marine debris

Wildlife will eat marine debris thinking it's food and ultimately end up dying

The ACA and its partnering organizations have collected and removed over 858,012 pounds of marine debris since 2002

The ACA's Paddle Green bags are designed so paddlers can remove marine debris while paddling

*Small Impact, Huge Results*
